

## U.S. President's Malaria Initiative

## ELIMINATE MALARIA

Established in 1948, Myanmar Nurse and Midwife Association (MNMA) is a professional organization working with qualified nurses and midwives for the improvement of health services in the country and to ensure appropriate access to healthcare at the village level. MNMA is a member of the International Council of Nurses and a member of the International Confederation of Midwives as well. It has a wide range of services in health care delivery reaching right down to the village level through 392 branches throughout the country with over a total of 30,000 members including licensed Nurses, Midwives and Lady Health Visitors. The MNMA works with nursing and midwifery personnel (in-service or retired) to improve the quality of health services in the country and to ensure appropriate access to healthcare at the village level. Previously MNMA has been a partner of the Control and Prevention of Malaria (CAP-M) project in 2014-2016 and Defeat Malaria project funded by USAID with URC from 2016 up to now in Gwa and Thandwe Township of Southern Rakhine State starting from October 2016 up to now. Moreover, the COVID-19 response activities were undertaken in four Townships (Ann, Kyaukpyu, Toungup and Thandwe) as an integral part of Defeat Malaria project in coordination with URC.

The remarkable reduction of malaria morbidity and mortality during the past decade, a political commitment to malaria elimination among GMS countries, the availability of funding support for further reduction of malaria transmission and the availability of technical guidance documents for malaria elimination are the driving force of moving toward malaria elimination. In connection to this, MNMA will operate malaria elimination activities in three Townships (Gwa, Kyaukpyu and Thandwe) in Southern Rakhine State and another three Townships (Launglon, Thayetchaung and Yebyu) in Thanintharyi Regions in coordination and collaboration with NMCP to ensure comprehensive coverage as a new five-year term project of "Eliminate Malaria" (2021-2026) and now looking for appropriate candidates of the following positions to work in this new PMI-EM project Townships mentioned above.

| Post description                         | # of posts | Townships/ Job location   | Project period                     | Remarks        |
